

Project Development Phase Model Performance Test

Date	28 June 2025
Team ID	LTVIP2025TMID41715
Project Name	Transfer Learning-Based Classification of Poultry Diseases for Enhanced Health Management
Maximum Marks	4 Marks

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Values	Screenshot
1.	Model Summary	The model uses MobileNetV2 as the base model for transfer learning. It was pre-trained on ImageNet and fine-tuned with poultry disease images across 4 classes. The top layers were modified to include GlobalAveragePooling2D, Dense layers, and Softmax activation. This architecture balances speed and accuracy.	
2.	Accuracy	Training Accuracy – 97.8% Validation Accuracy -94.3%	
3.	Fine Tunning Result(if Done)	Validation Accuracy -95.6% The base model's last few layers were unfrozen and trained using a lower learning rate to improve feature extraction.
